JUNE

MONDAY	TUESDAY
16	17 Nobel Laureate Palade! in Cole Hall at 4 p.m.

George E. Palade, winner of the Nobel Prize for Medicine and Physiology in 1974 will present the Smith/Kline French lectures on Monday and Tuesday, June 16 & 17, in Cole Hall at 4 p.m. He will lecture on "Protein Secretion Revisited" on June 16 and "Membrane Biogenesis" on June 17.

Palade, an internationally known cell biologist at Yale University School of Medicine, received his training in classical histology and histophysiology in Romania. He worked at Rockefeller Institute and University on cell fractionation and electron microscopy before opening his own laboratory at Yale.

The lectures are sponsored by the Department of Biochemistry and Biophysics.

The first national interdisciplinary journal of continuing education in health sciences will make its first appearance in January 1981, published by UCSF's Division of Continuing Education in Health Sciences (CEHS) in cooperation with UC Press.

Möbius, edited by Lucy Ann Geiselman, dean of CEHS, is planned as a unique and timely publication which will feature articles exploring continuing education issues that confront the numerous health science disciplines. Barbara Riddle is associate editor and Naheed Aly, Publications Officer, is managing editor. A distinguished editorial board is comprised of heads of continuing education departments at leading universities, among them the Universities of Wisconsin, Michigan, British Columbia, Oxford, and UCLA.

Möbius editors are seeking original manuscripts relevant to the theory and practice of continuing education programs in the health sciences. Of particular interest are articles pertaining to development of innovative CE teaching methods, relicensure and competency, objectives of CE, the impact of national health trends on CE programming, the effective use of media for continuous learning, marketing and promotion techniques in CE, and the relationship of CE to quality health care.

For further information write to Editor, *Möbius*, 24 Kirkham St., UCSF, San Francisco CA 94143.

NEWS BRIEFS

Free hypertension screening for all faculty, staff, and students will be held on Thursday, May 29, in the Board of Governors Room, Millberry Union (8 a.m. to 5 p.m.), UC Hospital Lobby (8 a.m. to 7:30 p.m.), and the social work conference room, A 44 (10 a.m. to 5 p.m.).

The screening, sponsored by the Office of Public Service Programs, is part of the annual National High Blood Pressure Month. The National Heart, Lung and Blood Institute and the National High Blood Pressure Education Program coordinate the program each May to inform the public of the nature and treatment of the disease and to identify potential hypertensives.

One out of every six persons in the U.S. today is hypertensive. Undetected and uncontrolled, high blood pressure can lead to heart attack, stroke, and kidney failure.

If you would like to volunteer your services during the screening, contact Vida Labrie or Donna Mori at x3206. School of Nursing volunteers contact Betty Furuta at x4755.

UCSF researchers have become the first to test successfully a new approach to kidney transplantation. They have found that simply giving a patient blood transfusions from the kidney donor before surgery dramatically increases the chance that the new kidney will function well. Although the reasons for this are still unclear, it appears that the transfusions improve the body's biochemical reaction to the new organ.

The work was reported at the 100th annual meeting of the American Surgical Association by Oscar Salvatierra, Jr., chairman, UCSF Transplant Service; Nicholas J. Feduska, associate clinical professor, Surgery; Flavio G. Vincenti, assistant clinical professor, Medicine; William J.C. Amend, associate clinical professor, Medicine and Surgery; Donald E. Potter, associate clinical professor, Pediatrics; and their colleagues.

UCSF's Rosalind Russell Arthritis Center has ongoing free services for persons in the Bay Area with arthritis.

Being offered are classes in rheumatoid arthritis, which teach individuals about the medical and psychological aspects of the disease. Osteoarthritis classes provide information to increase understanding of this "wear and tear disease" and help sufferers lead a fuller life. Movement classes are also available, designed specifically for persons with arthritis, that teach appropriate home exercises. For registration or further information call x1192.

A breast cancer risk analysis program has started at UCSF under the direction of Patricia T. Kelly, assistant research geneticist. The unusual program, begun as a study two years ago with funding from the National Cancer Institute, is now an established fee-for-service program, combining the expertise of three disciplines: surgery, genetics, and epidemiology.

Nicholas L. Petrakis, chairman, Epidemiology and International Health, and Thomas K. Hunt, professor, Surgery, have worked with Kelly to formulate this interdisciplinary approach to the analysis of a woman's risk of having breast cancer.

The risk assessment, derived from an hour-long interview, is based on family and personal medical history, including reproductive history. Although no medical testing will be done, self-referrals and physician referrals can be made, and test results will be given to referring physicians. For further information or an appointment call x1375. A $100 fee will be charged for the two day evaluation.

The Alexander Simon Library/Reading Room will be dedicated this fall at SFGH, honoring the professor emeritus who served as chairman of the UCSF Department of psychiatry from 1956 to 1974. Dr. Simon is nationally known for his contributions to psychiatric education.

The reading room, established by the SFGH Social & Community Services, will be used by faculty, students, and staff.

Donations of books and journals in psychiatry, psychology, psychoanalysis, social science, psychiatric nursing, and social work are being sought, as well as monetary donations to defray the cost of current periodicals. For further information write Alexander Simon Library Donation, Rm. 7M12, SFGH, or call x7-373.

A free public meeting on "The Sun and Cancer" will be presented on Tuesday, June 3, 8 to 10 p.m., in the Forum of Fireman's Fund Building, 3333 California St., S.F. The meeting, sponsored by the S.F. Regional Cancer Foundation, features UCSF faculty members Scott Blois, director of the Melanoma Clinic; John Epstein, professor, Dermatology; Kathryn Kudzia, clinical pharmacist, and Laurens P. White, medical oncologist, who will be chairman. For further information call 221-2132.

Myths of male and female sexual behavior will be discussed at an educational seminar for the public on Wednesday, May 28, in 303 HSW, from 5 to 8:15 p.m. The program, sponsored by the Sex Counseling Clinic, Human Sexuality Program, also will address common sexual concerns and basic sexual physiology. Sliding scale fees range from $10 to $20 per person. Those interested should make reservations by dialing x4623.

The Sex Counseling clinic offers outpatient clinic and in-hospital sexual counseling, a curriculum in human sexuality for medical students, a sex therapist training program and a research division.

Sixteen older adults, who have worked as trainees in child care centers throughout San Francisco for the last eight months, will be graduated from UCSF's Intergenerational Caregiving Project on Wednesday, June 11, from 4 to 6 p.m. in Millberry Union combined lounges.

The participants were part of a unique child-care training program, funded by the California Post Secondary Education Commission. The program is coordinated by Marlene Cresci Cohen, lecturer in Family Health Care Nursing in the School of Nursing, and provides background information through lectures, discussions, and workshops designed to enhance the participants' understanding, communication, and skills in caring for children.

The faculty consists of professors of human development, experienced child-care givers, and peers who are currently in community service, many from the Foster Grandparent Program at Moffitt Hospital. Training placements have been made at St. Patrick's Day Care Center, Stonestown "Y" (Jewish Community Center), John Swett School, the Family Development Center, SFGH Department of Pediatrics, Moffitt Hospital Pediatrics, and the UCSF Child Care and Study Center.

The Annual Medical Staff Dinner Meeting will be held on Thursday, June 12, in the Golden Gate Room, 274M. Dinner is at 6 p.m., followed by a 7 p.m. meeting. Richard Matiland Knapp, director of the Department of Teaching Hospitals of the Association of American Medical Colleges, will speak on "Can We Shape Our Future in the '80s?" To make a reservation call x1401 before June 2.

The Childcare Switchboard and the S.F. Department of Public Health are cosponsoring a "Loan-A-Seat" program, in which parents may borrow a safe infant car seat and keep it until their infant outgrows it at 20 pounds. A $10 deposit is required, which is refundable when the car seat is returned.

To make arrangements to borrow a car seat, contact Norisa Berardi or Beverly Kimball at 826-1130 between 9:30 a.m. and 4:30 p.m. The Childcare Switchboard is located at 3896-24th St.
